with I.NPB 4, I.NP-x-D y (B)

---

Information correct at: 02/26/2015

## About this document

This document has been set-up very thoroughly based on the infrastructure connection contracts (IVV) between DB Netz and its neighbouring infrastructure managers ProRail, Infrabel, SNCF Réseau, SBB Infrastruktur, ÖBB Infrastruktion, SZDC, PDV railway, PLK and Banedanmark. It contains also special rules which apply on certain border-crossing railway lines.

All of the rules that are shown in this document apply only on the DB Netz infrastructure. All information regarding neighbouring infrastructure on the border-crossing railway line are only shown for orientation purposes. Please keep yourself up-to-date to the regulations and of the respective neighbouring IM.

### Key:

blue coloured	<b>area of timetable construction of non-DB Netz-IM</b>
red coloured	<b>area of timetable construction DB Netz</b>
light grey coloured	<b>foreign territory</b>
dark grey coloured	<b>German territory</b>
orange coloured	<b>Handover-Point</b> bilaterally defined between both IMs for each railway line. For each IM there has to be put in one PCS handover operation point.
bold bordure	<b>mandatory operation point</b> These operation points have to be put in the RU timetable, even in case the RU does not plan any activities there
intermittend bordure	<b>state border operation point</b> On certain border-crossing railway line, it is mandatory to request the state border operation point in the RU timetable. These operation points must always be requested as run-through.
dashed bordure	<b>optional operation point</b> Can be requested by the RUs for orientation purposes or in case that any activities are planned at them.
purple coloured	<b>operation point missing in PCS</b> In case that an operation point which is factually present at the border-crossing railway line, but is non requestable via PCS due to missing data in the PCS operation point database, it is shown in purple colour.
